CCW Deck Coatings

Vehicular, Pedestrian & Specialty Deck Coating S

Carlisle Coatings & Waterproofing, Inc. (CCW) provides a broad range of solutions to meet specific waterproofing needs. CCW offers technical services, research & development and manufacturing capabilities from its headquarters in Wylie, Texas and three additional manufacturing facilities in Terrell, TX, Elberton, GA, and Carlisle, PA. The CCW network is further supported by over 50 manufacturer's sales representatives directed by regional sales offices throughout the country. CCW offers a complete line of waterproofing and moisture protection products for the architectural, general construction, industrial and maintenance industries. Carlisle Coatings & Waterproofing, Inc., is part of the SynTec Division of Carlisle Companies, Inc., which is a publicly traded company on the NYSE.

Carlisle Coatings & Waterproofing supplies a wide variety of elastomeric polyurethane deck coating systems. These systems serve to protect the structure by waterproofing the concrete substrate while providing an attractive wearing surface. Each system consists of a durable, skid-resistant wearing surface and a waterproofing layer, which protects the above-grade decks from the damaging effects of water and chlorine ion

penetration, thereby preventing the water from penetrating the spaces below. Special, low VOC compliant coatings are also available and all CCW deck coating systems meet the requirements of almost any project — from apartment balconies to high traffic vehicular decks.

VEHICULAR

CCW-5123: Vehicular Traffic Deck System

The CCW-5123 Deck Coating System is a three layered system designed for vehicular traffic on parking decks and driveways. For protection on areas such as ramps, curves, and critical spots, CCW-5123HD provides additional strength and skid resistance. For extreme wear applications, a high build system can be applied for even more durability.

PEDESTRIAN

CCW-5013: Pedestrian Traffic Deck System

The CCW-5013 System is designed to protect walkways, terraces and other areas subject to foot traffic with an attractive, monolithic, skid resistant waterproofing system. CCW-5013HD is available for heavier traffic areas.

CCW-5013-C: Decorative Pedestrian Traffic Deck System

The CCW-5013-C System is an aesthetically pleasing, high mil thickness waterproofing system with a decorative exposed aggregate finish. It is designed for use where a unique decorative appearance is desired.

SPECIALTY

CCW-5113: Mechanical Equipment Room System

The CCW-5113 System is specially designed for waterproofing concrete decks in mechanical equipment rooms with a monolithic coating over and around equipment pads and protrusions.

CCW-5213: Elevated Pool & Tennis Deck Systems

The CCW-5213 System is used to waterproof above grade recreation decks such as pool surrounds and tennis courts. It provides an attractive, skid resistant surface for recreational activity.

CCW-5313: Plywood Deck System

The CCW-5313 System is used for waterproofing balconies, sun decks and other plywood decks subject to pedestrian traffic.

LIMITED WARRANTY

CARLISLE COATINGS & WATERPROOFING, INCORPORATED (CARLISLE) warrants this product to be free of defects in workmanship and materials only at the time of shipment from our factory. If any CARLISLE materials prove to contain manufacturing defects that substantially effect their performance, CARLISLE will, at its option, replace the materials or refund its purchase price.

This limited warranty is the only warranty extended by CARLISLE with respect to its materials. There are no other warranties including the implied warranties of merchantability and fitness for a particular purpose.

CARLISLE specifically disclaims liability for any incidental, consequential or other damages including, but not limited to, loss of profits or damages to a structure or its contents arising under any theory of law whatsoever.

The dollar value of CARLISLE's liability and buyer's remedy under this limited warranty shall not exceed the purchase price of the CARLISLE material in question.
